

VOTERS PARTY INTERNATIONAL

CONSTITUTION

Chapter-One

ARTICLE - 1

NAME OF THE PARTY-

Voters Party International, hereafter it will be mentioned as the party.

1.1 PREFACE OF THE PARTY CONSTITUTION

Objectives of the Party are as under:-

By implementing the essential political, legal and constitutional reforms;

Establishing rule of democratic law, not only at the level of country but at the level of world also;

Identifying and recognizing the horizontal and vertical sovereignty and general will of the masses and that of the state, getting them recognized, getting representation in the decision making process of the state for all kinds of general wills and all types of sovereignties;

Making available the economic, political opportunities for all the citizens of the world- democracy, fraternity and equality;

Evolving a competent political and economic world order on the basis of justice for all to eliminate the circumstances from the whole world creating violence, economic slavery, poverty and environmental imbalances.

1.2 POLICY OF THE PARTY

Solution of the problems of citizens of the world will be worked out by the world citizens for the citizens of entire world.

1.3 PRINCIPLES, PHILOSOPHY AND ASSUMPTIONS OF THE PARTY-

The members of the party will study to understand and to believe in the following assumptions-

- 1.3.1** In the literature written by the contemporary political reformer shri Bharat Gandhi, consists the total view points of the great men and philosophers of the past and real solutions all those contemporary problems which can be solved by the machinery of the state. It contains also the information of feasible solutions to cope up with the challenges, likely to be created in future, and of their remedies, workable in present.
- 1.3.2** All the homo-sapiens of the entire earth behave like the cells of a common body. Therefore, as no organ of the body can be treated, separating it apart from the body, likewise no permanent problems of any country can be solved, by separating it apart from the whole world.
- 1.3.3** Human beings and the earth, both are created by nature. Hence, going to and from on the entire earth is their fundamental right, the violation of which should be treated as the violation of fundamental rights. The entry in the house can be prohibited only by the house-maker, likewise entry in the earth any where can be prohibited only by the maker of the earth. The methods and traditions like Visa, to check violence and terrorism in the world, have themselves become the causes of violence and extremist terrorism. These prevalent traditions and methods regarding visa are based on political superstitions, their elimination is indispensable to combat the violence and terrorism from the world.
- 1.3.4** As the longevity of the body of every individual is fixed, likewise the age of the human society is also fixed. The changes occur in the body and mind of the individual, along with age. Likewise changes come in the nature of society with the growing age. Hence the values, faiths and rules of communities have no eternal longevity. After a period their forms change.
- 1.3.5** The ecstasy and pleasure cannot be created, neither can it be destroyed. It is only transferred from consciousness to body, from one individual to another, from one community to the other, from the country to another country and from one living species to another living world, mutually.

- 1.3.6 Strength is not provided by the nature to assault some weaker one, but it is provided to protecting the weak.
- 1.3.7 To decentralize one thing, it is necessary to centralize some other thing. Centralization is news for decentralization. Hence the energy of the party will be applied, instead of preventing centralization, to disseminate the advantages of centralization to the decentralized units, to the extent of each and every individual.
- 1.3.8 Money is an item, produced by a collective enterprise. Hence, to get money, it is essential to renounce private values.
- 1.3.9 In the private income of an individual; share of political system of producing paper money, share of laws and share of nature is also included. This share is more to the extent of the private money more than average any person has.
- 1.3.10 Two communities, between which an historical enmity is apparent, and two ideologies which appear mutually hostile to each other, are like two electrical wires of earth and phase. If they are directly connected with each other, there is sparking, and if joined together connecting through a resistance a bulb is made, which shades light everywhere. Likewise mutually hostile ideologies and communities are harming to each other but beneficial to the group requirement of humanity. Hence, the party believes in peaceful and democratic forms of expression of dissent. The party declares that it will not in any manner promote or instigate or participate in violence.
- 1.3.11 Functioning of the party will be totally democratic in real sense. The decisions of the party will be taken by the views of majority of representative bodies of respective level and respective organ.
- 1.3.12 The party must contest an election conducted by the Election Commission within five years of its registration and thereafter should continue to contest.

1.4 OBJECTIVES OF THE PARTY
